

# Compare and Order

To compare numbers change all the numbers to decimals and then compare.

To change a percent to a decimal move 2 places to the left  $35\% = .35$

To change a fraction to a decimal divide the numerator into the denominator.

$$\frac{3}{5} = .60$$

To change Scientific Notation  $1.4 \times 10^4$  move the decimal 4 places to the right. If it is a negative exponent the decimal would move to the left
