

Square Root

SQUARE ROOT OF A NUMBER IS ANOTHER NUMBER, WHICH MULTIPLIED BY ITSELF WILL GIVE YOU THE ORIGINAL NUMBER.

Example: The square root of 9 is 3. 3 is another number which multiplied by itself gives 9 (the original number).

A CALCULATOR IS NEEDED TO FIND MANY. PUT THE NUMBER IN THE CALCULATOR AND PUSH THE SQUARE ROOT BUTTON.

Example: Square root of 10 Enter 10 in the calculator, then press the square root button-- 3.16227. Now round it to the nearest hundredth-- 3.16. To round a number, look at the the number to the right of the place you want to round. If it is a 5 or more add 1 to the place, if it is less than 5 the place stays the same.

Example 3 times the square root of 5. Put 5 in your calculator, push the square root button, giving 2.23606----. Multiply this number by 3 and get 6.708--. Round this number to the nearest tenth. The tenth place is the number 7. To the right of the
